The following corrects errata contained in the Final Environmental Impact Report (FEIR) for the Kol Shofar Conditional Use Permit project.

1. On page 1 of the FEIR, it states that the public review period for the DEIR was July 7 to August 15, 2005. It should state that it was from July 1 to August 15, 2005.
2. Response I7 in the FEIR describes a new mitigation measure for the project that includes the requirement for a parking receipt that attendees at new evening weekend and weekday "special events" must show before being allowed entrance to those events. This receipt guarantees that attendees of new major events have parked on the site. The response incorrectly stated that this program was currently being conducted at San Domenico School. While the County is monitoring traffic generated by special events at that school, attendees are not given parking receipts for these events. It was the EIR preparers' understanding that this monitoring was for exactly the same type of parking program recommended in Response I7. However, the EIR preparers were misinformed. Thus, the next to last paragraph under Response I7 (on page 190 of the FEIR) will be deleted.

This error does not affect the recommended mitigation measure, nor does it alter the FEIR conclusion that implementation of this mitigation measure would reduce Impact 3.3-C to a less than significant level. The recommended mitigation measure is feasible and would reduce the traffic safety impact to a less than significant level.
